

IMAGINE CONVERSATION BETWEEN THESE PEOPLE

John: Well, nowadays, people are unable to have products with certain shape, features, and functionalities that meet their needs. When they look, it takes too much time to find that specific item

Rita: but, what if they need the product sooner than later?

Katherine: they will have to create it from scratch based on those preferences and needs?

Anas: but they don't have materials, knowledge, nor the experience to do so?

MEET DESIGN MALL

Design Mall is an online-driven solution to manufacture and engineer products from scratch using a 3D Canvas display and online cutting-edge technologies. Allowing people to transfer their creative ideas into a real tangible items

MISSION

Design Mall's 'What' is

Providing people the ability to manufacture products online, from scratch, and based on absolute preferences.

Design Mall's is for

EVERYONE

who does not have experience, knowlegde, or material to create a product, whether digital or physical,

Design Mall's 'Why' is.

to help the advancement of technology in the world by providing solutions that help people solve their problem in a more efficient and quick manner

VISION

Our Desired Future:

Design Mall aspire to provide the possibility for customers to make every type of products from absolute scratch in less than 1 hour. Our future revolves around the idea of making every thought transformed into a physical object, no matter what it is and what material it needs, from clothing, to cars...

What is Success for Design Mall?

Success for Design Mall is defined as the realization of the dream that involves seeing people creating products from scratch online, transform their ideas into physical or digital assets, and use them in their daily life to accommodate their needs.

Why are we in Business?

We are in business to make a difference in society and add value that never existed. We are here to facilitate the process for people to have products based on preferences or needs, without the need for knowledge nor material, this way, helping people to create products that solve their problems in an instant

DEAR ESTEEMED READER,
