

ICK Solution

The IC Kitchen is a powerful combination of artificial intelligence and the Internet of Things to make a kitchen fully connected to assist the user in several functions making the process easier, more convenient and more personalized.

ICK Solution

In practice, it allows, among other things, the following services: assistance with cooking recipes through tutorials, recipe suggestions based on available ingredients, monitoring of ingredient consumption and automatic ordering in the event of a shortage, automated cooking thanks to robots and finally real-time monitoring and smartphone notifications.
